## PERSONAL SUMMARY

My name is Charles Njogu Kabui, a 23 years old Kenyan, currently living in Kisii, western Kenya. I am careful, imaginative, keen to details, and I genuinely enjoy applying diplomacy, and logic in everything I do. I love writing programs and seeing them work. If I were not a software developer, I would be a Photographer, because I love nature; or a Philosopher, because I like rationality. Am a Software Engineer by profession, mostly inclined to all possibilities of web development, and computer vision, with C#. Most of my experimental source-codes are visible for free at http://github.com/mckabue. I am currently in search for an inspiring, career building, and self-advancement internship, or job.

## SKILLS & ABILITIES

a. Basic, intermediate and advanced understanding of how to work with computers, and computer systems
b. Good knowledge of ASP.NET
c. Master in C# (Both desktop and for web)
d. Best in HTML5
e. Pro in CSS3
f. Proficient in JavaScript, and some surrounding frameworks
g. Talented in User Interface design
h. Ability to follow Instructions implicitly

## EDUCATION

### KISII UNIVERSITY (2012 – 2015) - BACHELOR OF SOFTWARE ENGINEERING

Completed my final semester in August (2015), and awaiting graduation sometime between December 2015, and December 2016

### CHINGA BOYS HIGH (2007 – 2010) - KENYA CERTIFICATE OF SECONDARY EXAMINATIONS

I liked physics and chemistry the most, and got a B+ total
