PERSONAL SUMMARY

My name is Charles Njogu Kabui, 23 years old, currently living in Kisii, western Kenya. I am imaginative and keen to details. I like architecting and designing application. Am a Software Engineer by profession, mostly inclined to all possibilities of web development with C#. I can create simple to very complex mobile applications, web applications, and desktop applications given time and resources. Most of my experimental projects are visible for free at *http://mckabue.github.io/#projects* or directly at my Github repository, *http://github.com/mckabue*. I also own a private Bitbucket repository for private projects. I genuinely enjoy applying diplomacy, and logic in everything I do. I am currently in search for an inspiring, career building, and self-advancing internship, training or job.
